C.H.O.I.C.E.S. is a system of computer stored information on 300 occupational clusters. It is a tool used to aid in the process of career development. The purpose of the workshops is to show students how to use the program effectively as they work through the decision-making process by -

- assessing needs and abilities
- setting priorities
- interacting with the computer
- identifying career alternatives
- choosing a career

Please ask interested students to contact the Counselling receptionist, Room 3002.

BICYCLE THEFTS

There has been a disturbing increase in bicycle thefts since the bus strike began. Please advise students that an economical lock on an expensive/attractive bicycle is a very poor investment. Security have had some success in apprehending suspects but their wise advice is that bicycle users should invest in a heavy duty lock system.

YOU KNOW IT'S GOING TO BE A BAD DAY WHEN:

Your horn goes off accidentally and remains stuck as you follow a group of Hells Angels on the freeway.

A NOTE OF APPRECIATION

Joan Cornish is taking early retirement, beginning next week. In a note I received from her, she writes "Once again, I would like to say how deeply I appreciated the many kind and warm thoughts that were expressed by all staff personnel" (at last week's coffee and cookies farewell party).

On behalf of all of us, I want to wish Joan a happy retirement with an abundance of joie de vivre.
