11 am to 1 pm Wednesday June 17 to have the test 'read'

IT IS IMPORTANT FOR YOUR HEALTH TO HAVE A T.B. SKIN TEST ONCE A YEAR IF YOU ARE IN A POSITION WHERE YOU MAY BE EXPOSED TO TUBERCULOSIS ... OR HAVE A CHEST X-RAY IF YOU HAD A POSITIVE TEST IN THE PAST OR ARE OVER AGE 35.

Note: T.B. tests are also done in the Student Health Service any Monday, Tuesday, Wednesday or Friday. Drop into room 3007 and ask us about it.

The skin test is done by inserting a small amount of liquid called PPD between the layers of the skin on the forearm.

If the place where the test was given becomes raised and hard, the skin test is positive. This does not mean you have tuberculosis disease. It means you have been infected with the TB germ at one time.

# OUTREACH: An Alternative Model

## The GMCC Experience

Since its inception in 1971, Grant MacEwan Community College has been involved in outreach education. Originally this function was provided by the Continuing Education Division which operated as a relatively autonomous unit -employing and paying its own staff and developing and delivering educational activities to meet identified needs and interests.

In 1981 the college moved to a new Outreach Model under which each of the divisions within the college operates its own outreach program as an extension of daytime programming.

In the area of budgeting, total revenue from outreach and community education now exceeds 20% of the total operating revenue of the college. It is projected that outreach will continue to generate an increasingly significant portion of the college's operating revenue budget.

In this one day seminar, we will examine the outreach education system experience over the past 6 years. A variety of Grant MacEwan faculty and staff will address their role and experience with outreach education in an honest and open manner.

We do not claim the expert role, nor do we have all the answers. We are willing, however, to share our EXPERIENCE with those who are interested in or who are actively developing their own outreach education program.

Participants will examine the components of the outreach education system of Grant MacEwan. As well, time will be allowed for participants to share their own experiences and concerns and to examine some of the key questions about outreach education.

This seminar is designed for both faculty and administrative participants, and a special offer is made to institutions who are interested in sending a pair of representatives.
