Tips on Prolonging the Life of Films

The green leader on all KEC films indicates that it is a KEC film and must remain attached to the film. Since the point of greatest stress is where the leader joins the film, it should be a minimum length of three feet.

If the film itself is broken, do not try to repair it yourself, but report it to the library staff.

Please leave a note attached to the film can if you notice any other problems (poor sound quality, film slips, etc.).

We would also like to remind you that we have the following selection of new videotapes:

- | | |
|---|---------------------------------------|
| - Steve Gadd in Session | - ESL Literacy: An Introduction |
| - I, Leonardo | - Awakening Entrepreneurial Spirit |
| - Classical Training Applied to the Pop Voice | - Job Search (3/4") |
