SANTÉ

There is evidence that red wines contain a substance that fights cancer. Red wines contain quercetin which has been shown to help prevent cancer in laboratory animals. Terrance Leighton, a microbiologist at the University of

California at Berkeley maintains "Quercetin is one of the strongest anti-cancer agents known. It directly blocks the proliferation of cancer cells."

This is one reason why the King Edward Fermentation Society continues to solicit new members. The group is almost ready to bottle the Bordeaux started in June. It looks like a wine loaded with quercetin. Think of your health and join the group. Call Sam Lewindon (Local 725) or Sarah Lucas (Local 287) if interested or for further details. The next meeting of the Society will be September 19, 1991, at 3:45 p.m. in Room 2145.

ALL CAMPUS COUNCIL

Due to the inefficiency of the Chair of the ACC (my apologies!) the meeting scheduled for September 17, 1991 is postponed to:

Tuesday, October 08, 1991

unless the majority of the members prefer October 15, 1991. I had forgotten, when we set the original date, that I had to alert all departments and areas to the need to elect or re-elect reps for the second 2 year term. (Yes! The ACC is 2 years old.) There will also be electives for the Executive. Drop me a note about the new meeting date or call me at local 567.
