#### FROM NORMAN VINCENT PEALE

Think excitement, talk excitement, act out excitement, and you are bound to become an excited person.

Life will take on a new zest, deeper interest, and greater meaning.

You can think, talk, and act yourself into dullness or into monotony, or into unhappiness.

By the same process you can build up inspiration, excitement, and a surging depth of joy.

#### "AUTOMATING THE OFFICE" TV SERIES

The "Automating the Office" television series is being shown on the Knowledge Network every Monday at 08:30 pm with a repeat telecast on Saturday evenings at 6:00. The series will run for nine weeks and began on Monday, October 6th.

This television series is designed to introduce the learner to the concept of Office Automation, and explains the combinations of the new office technologies, examines the new computer-based tools, and takes a look at the effect these changes will have on office workers and their environment.

The videos were produced by TV Ontario and the accompanying course materials were prepared by Marion MacIsaac in concert with Diana Basaraba and Elaine Decker for use throughout the province.

This is an excellent series and one which every office worker from manager to junior clerk is sure to find interesting.
